

Brandon Tsang

Senior Frontend JavaScript Developer

<personal info redacted>

brandononline2@gmail.com /// github.com/brandongit2

Experienced frontend JavaScript developer with a strong background in creating robust and experimental user interfaces and APIs. Proven ability to excel in both large and small team environments, using self-taught technical skills to consistently introduce fresh ideas. Actively seeking a role in a small-to-medium-sized company that offers opportunities for decision-making and substantial product impact.

Skills

- Mastery of JavaScript/TypeScript, React.js, HTML, CSS/TailwindCSS, Next.js, Git, WebGL/Three.js, and many similar technologies, with the ability to pick up new skills quickly
- Strong familiarity with many backend technologies, such as Node.js, Docker, SQL, REST/GraphQL, as well as cloud platforms such as Google Cloud Platform (GCP), AWS, and Vercel
- Proficient in creating responsive and mobile layouts, with a strong competency in CSS/JS animation
- Long history of building and maintaining UI component libraries with Storybook and Figma

Experience

SprintZero — Software Engineer

November 2022–July 2023

- Worked in a small team, building a project management SaaS application from the ground up.
- Introduced best practices and new workflows into the codebase, making the application and developer experience much more stable.
- Realized a complex drag-and-drop visual tool for laying out “user stories”; the core feature of the product.

Hemlane — Intermediate Software Developer

January 2022–September 2022

- Worked uniquely in a cross-functional setting with our marketing team, giving them new targeting abilities and more representation in the product.
- Laid groundwork for a new marketing analytics platform for more effective targeting of marketing strategies.
- Advocated for accessibility in the marketing site; made great improvements to the site’s SEO.

Mintbean — Intermediate Software Developer

March 2021–December 2021

- Worked on several full-stack projects, primarily using TypeScript and React.
- Built a job board site from scratch, leveraging complex CSS techniques to achieve a unique look and feel.
- Actively participated in a company-run developer community with over 2 700 members. Helped new developers grow and answered technical questions.
